# Description

# Industry Trendsetter

## One-piece molding technology is born without after-sales Industry Trendsetter

The whole system is the world's leading industrial intelligent manufacturing 5.0 intelligent production line, which combines cutting-edge technology and technology. To ensure product accuracy and quality, with no after-sales background, truly open a new era of door and wall materials.

## Disruptive 7-day shipping cycle

Break the shipping cycle of the traditional industry; with the concept of high efficiency, high quality and high service, you will be far away from the trouble of long waiting and fast-paced is no longer far away.

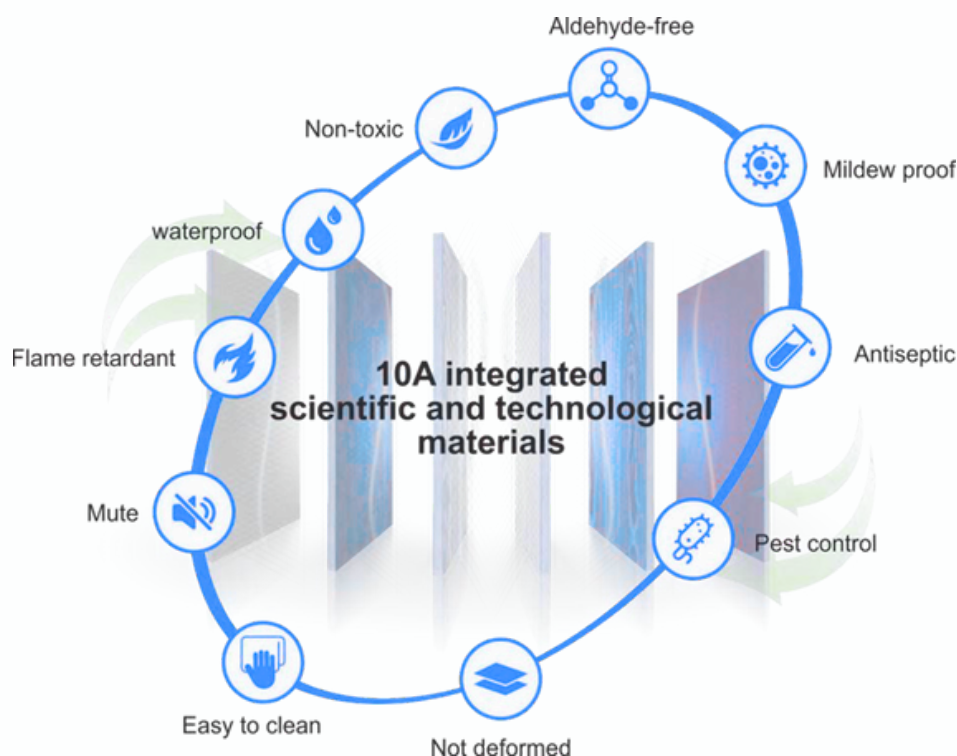

## Natural pine rock material is healthy and pollution-free

The raw materials are selected from natural pine wood powder and basalt rock powder, through German cutting-edge technology and equipment, relying on medical polymer polymerization technology, without any adhesive, one-time integrated high-temperature extrusion molding, creating a 10A integrated technology material; subverting the traditional Home improvement industry and health awareness.

## Exclusive creation of door and wall module integration

Focus on providing users with exquisite life and high-end quality; to create high-value products and product supporting systems to meet the comfort and beauty of the entire home decoration space; let you who pay attention to value enjoy quality life.

## 10A standard opens clean installation life

### Natural raw materials, non-aldehyde and non-toxic

The raw materials are selected from natural pine wood powder and basalt rock powder, relying on medical polymer polymerization and encapsulation technology, without any adhesive, one-step high-temperature extrusion molding

### Waterproof and moisture-proof, no cracking

Superior waterproof performance, no fear of moisture and mildew, superior natural raw materials, no insects and ants.

### Noise isolation and mute

The chamber structures designed to effectively block noise.

### The decorative surface is dustproof and easy to clean

The decorative surface is rich and beautiful, easy to scrub, and always keeps brand new.

### Fire resistant and flame retardant

High temperature resistant for a long time, not easy to burn, flame retardant and safer.

### High strength, good toughness, no deformation

High strength, good toughness, strong and durable products, long life

## Guru Upvc whole house green customization door

### Deodorate

- Baydee selects natural pine wood powder and basalt rock powder for clean packaging, and adopts German cutting-edge technology. Relying on the medical polymer polymerization and fusion technology, without any adhesive, one-time high-temperature extrusion molding, to create a 10A body of scientific and technological materials.

Natural pine wood powder

Basalt rock powder

VS

## Traditional door

### Convenient

- One-time high-temperature extrusion molding process, strong product quality, no after-sales production;
- 7-day shipping cycle, high-efficiency service, support door-to-door delivery, dedicated line logistics distribution;
- 24-hour customer service to ensure worry-free communication.

Integrated molding

7 days delivery

VS

### Clean

- Waterproof without cracking and deformation;
- Convenient installation and easy operation;
- The decoration is dustproof and easy to clean, effectively avoiding secondary pollution during installation.

Waterproof and moistureproof

Beautiful and generous

VS

## Guru Upvc whole house green customization background door

## Traditional door

### Soundproof

- The sound insulation effect of Baydee's whole house green customization wall panel is up to 30 decibels (a total of 60 decibels in addition to the solid wall)

**VS**

Normal wall effect sound insulation is 30 decibels

### Fire prevention

- Fire rating reaches B2

**VS**

Paint, wallpaper, and diatom mud have no immunity to this.

### Moisture-proof

- Effectively prevent water seepage and mildew, the finish is rich and beautiful, easy to scrub, and always keep brand new.

**VS**

Paint seepage and fall off in rainy and wet weather, tiles can't stop sweating, and wallpaper is moldy and warped.

### Durable

- The life span can reach 20-30 years, which is 3-5 times that of the traditional wall.

**VS**

The life of the paint is 7-8 years; the life of the ceramic tile is 15-20 years.
